PROFESSIONAL EXPERIENCE

TransUnion | Software Developer | May 2024 - Present

- Build production AI-agent systems for research analysts with LangChain, LangGraph, Python and MLflow, covering NLP-to-SQL, natural-language search, Neo4j knowledge graphs, Apache Superset dashboard automation, RAG-based Q&A over chart data, anomaly detection and missing-pattern detection.
- Built sub-7-second search across multiple terabytes of proprietary data using DuckDB, Trino, Google Cloud Dataproc and Kubernetes; implemented dynamic search-pod scaling and location-aware data access.
- Earned TransUnion Champ Award in 2025 for contributions to Research Perspective and the CIBIL Dispute Resolution Platform.

HighRadius | Associate Software Engineer II | Feb 2023 - May 2024

- Developed parsing agents for BAI, MT940 and CSV bank-statement and transaction data used by 30+ enterprise clients.
- Improved API load time by 92% and parsing time by 62% through SQL tuning, code refactoring and user-based data-security controls.
- Built a Tomcat hot-reload proof of concept and partnered across Cash Forecasting and Core teams using Java 17, Spring Boot, Hibernate, SQL, AWS and Redis.

HighRadius | Associate Software Engineer I | Jun 2021 - Jan 2023

- Built Account Status and Cash Position Worksheet modules using Java, Spring, Hibernate, Struts, MySQL, JavaScript and ExtJS.
- Automated 50+ JUnit and JMeter tests, resolved quality and security issues, and delivered 50+ implementation tickets across 10+ stories.

PERSONAL PRODUCTS

Phone Down - Native Android Focus App | 2026

- Built a native Android focus app where time counts only while the phone stays face down and stable, using Kotlin, Jetpack Compose, Hilt, Room and a local-first multi-module architecture.

Multi-Agent Accountability Bot | 2026

- Designed a multi-agent Telegram bot with supervisor orchestration, five specialized agents, FastAPI, Gemini and Firestore; includes gamified accountability and nine pattern-detection types.
